

# BALBOA HIGH SCHOOL EDUCATIONAL SEMINAR

February 6, 2019

Recently, Presidio Bay Ventures (“PBV”) in a joint effort with the San Francisco Planning Department and UC Berkeley had the opportunity to discuss the San Francisco development process to a group of Balboa High School seniors at 65 Ocean Avenue, one of our upcoming development sites. Some of the topics discussed at this seminar addressed the issues facing new developments, impacts on affordability and the environment, transportation, and community amenities.

Given 65 Ocean is within a one block radius of Balboa High School, this is a prime opportunity for the students to engage with a living ground-up development case study. PBV is committed to both educating the future leaders of the commercial real estate industry and listening to the neighbors of any project we are involved in.
